

Client guide · step by step

# Get website form submissions straight to your inbox

**EdgeForm**, the elite form submission platform. Build a form, put it on your site, and every message lands in your email.

**Demo business:** Maple Street Bakery (Demo) is made up.

## Maple Street Bakery (Demo) - Cake Orders

Required fields must be completed before send.

Name

Jamie Demo

Email

registermysite.com+edgeform-test@gmail.com

Message

Hi! This is a test request for the Maple Street Bakery demo. I'd like an 8-inch vanilla birthday cake that says Happy Birthday, Sam for Saturday pickup. (Test submission for a guide, not a real order.)

| message | Hi! This is a test request for the Maple Street Bakery demo. I'd like an 8-inch vanilla birthday cake that says Happy Birthday, Sam for Saturday pickup. (Test submission for a guide, not a real order.) |

# A website form that emails you every message

## Describe it

Tell the form studio what you need in plain words, then publish.

## Pick your inbox

Choose the email address that gets each new submission.

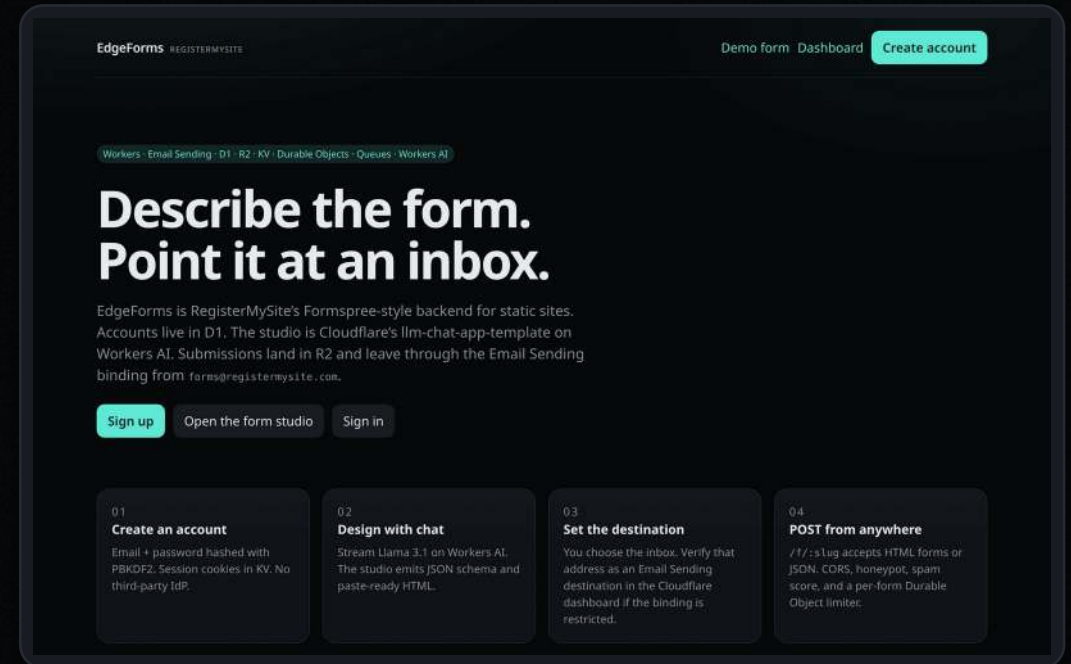

## Paste it anywhere

Copy the embed code and paste it into any web page.

## See every message

Each one is emailed to you and listed in your dashboard.

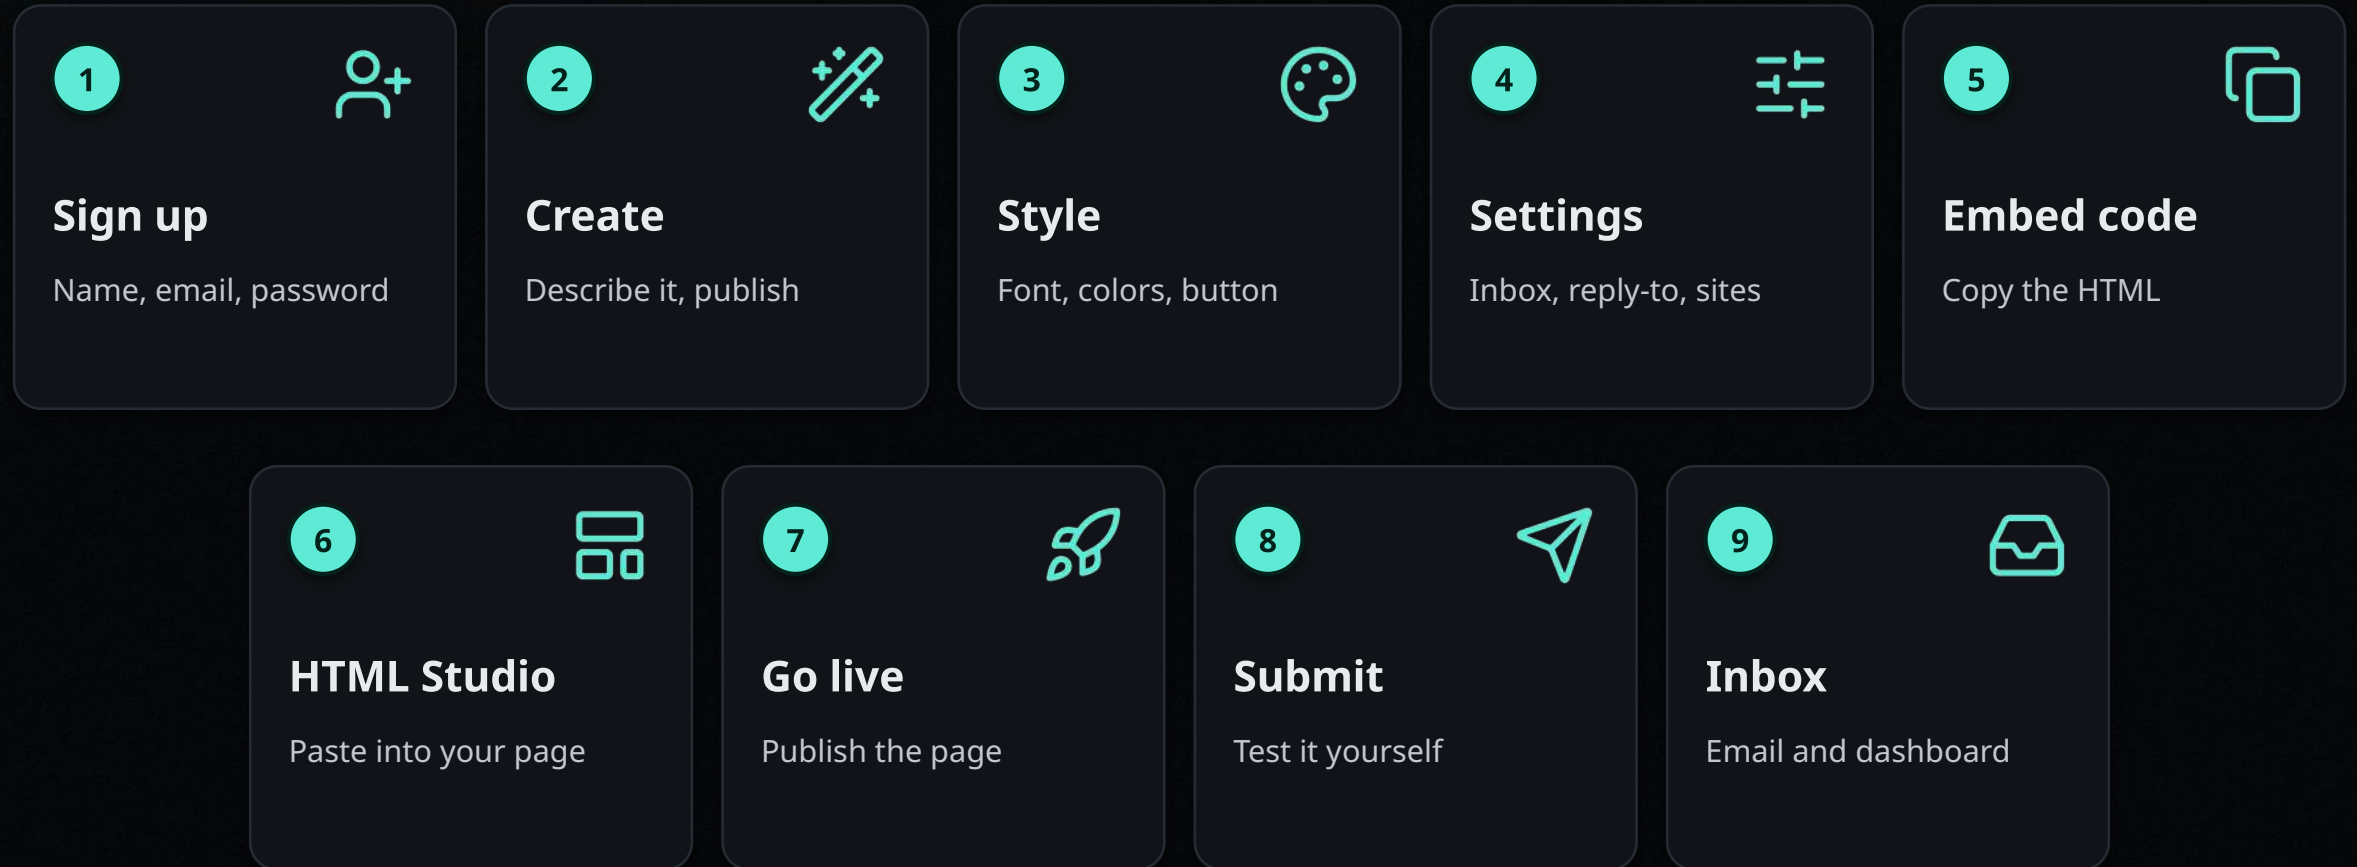

From the EdgeForm home page: "Describe the form. Point it at an inbox."

[forms.registermysite.com](https://forms.registermysite.com)

The site header says "EdgeForms". Same product.

# Nine small steps, from sign-up to your inbox

Every screen in this guide is a real screenshot from our demo account. Passwords are hidden.

# Create your free account

## Create your account

One account. Unlimited forms on the Cloudflare edge.

Name

1 Maple Demo Owner

Email

2 registermysite.com+edgeform-demo@gmail.com

Password

3 .....

4 Create account

## Go to [forms.registermysite.com](https://forms.registermysite.com)

Click "Sign up" (or "Create account" at the top).

1

### Name

Your name or your business name. We used "Maple Demo Owner".

2

### Email

An address you check. This is how you sign in.

3

### Password

Pick a strong one and keep it in a password manager. It shows as dots.

4

### Create account

That's it. In our test there was no code to type and no confirmation email.

### No card needed

We used the free sign-up only. No payment details were asked for.

# Coming back later? Sign in, then find Your forms

The sign-in form is titled "Welcome back". It contains three fields: "Email" with the value "registermysite.com+edgeform-demo@gmail.com", "Password" with masked characters ".....", and a "Sign in" button. Red circles with numbers 1, 2, and 3 highlight the email field, password field, and sign in button respectively.

**forms.registermysite.com/login**

Type your email (1) and password (2), then click Sign in (3).

The dashboard shows the "Your forms" section under the "INBOX" header. It includes a "No forms yet" message and a "Create a form" button. At the top right, there is a "New form" button and a "Log out" button. Red circles with numbers 4 and 5 highlight the "Create a form" button and the "New form" button respectively.

## 4 "No forms yet"

A brand-new account starts empty. Click Create a form.

## 5 New form

Same thing, any time: the button at the top opens the form studio.

# Describe the form you need in the studio

Describe the form and the fields you need. I return JSON. EdgeForms turns that into paste-ready HTML when you publish.

3 Cake order request form for Maple Street Bakery (Demo), a made-up bakery. Fields: name (required), email (required), phone, pickup date (date), cake size (select: 6-inch serves 8-10, 8-inch serves 12-16, Not sure yet), message for the baker (textarea, required). Button text: Send my request.

4

```
{
  "name": "Cake Order Request",
  "theme": {
    "font": "dm-sans",
    "background": "#ffffff",
    "text": "#111318",
    "muted": "#5c6570",
    "accent": "#0f766e",
    "fieldBackground": "#f4f7f6",
    "buttonText": "Send my request",
    "buttonColor": "#0f766e",
    "buttonTextColor": "#ffffff"
  }
}
```

1 Describe the form. Example: contact form for a roofing company with name, email, phone, job type, message.

2 Send

- 1 Describe your form**  
In plain words. We asked for a cake order form: name, email, phone, pickup date, cake size and a message.
- 2 Click Send**  
The studio is an AI helper.
- 3 Your request shows up**  
So you can check what you asked for.
- 4 The studio replies**  
It answers in code. You don't need to read it.

## What happened in our test

The reply had colors but no list of fields. The studio said "The model did not return a fields array." EdgeForm then made its standard contact form: Name, Email, Message.

# Name it, pick your inbox, create the form

Describe the form and the fields you need. I return JSON. EdgeForms turns that into paste-ready HTML when you publish.

Cake order request form for Maple Street Bakery (Demo), a made-up bakery. Fields: name (required), email (required), phone, pickup date (date), cake size (select: 6-inch serves 8-10, 8-inch serves 12-16, Not sure yet), message for the baker (textarea, required). Button text: Send my request.

```
{
  "name": "Cake Order Request",
  "theme": {
    "font": "dm-sans",
    "background": "#ffffff",
    "text": "#111318",
    "muted": "#5c6570",
    "accent": "#0f766e",
    "fieldBackground": "#f4f7f6",
    "buttonText": "Send my request",
    "buttonColor": "#0f766e",
    "buttonTextColor": "#ffffff"
  }
}
```

Describe the form. Example: contact form for a roofing company with name, email, phone, job type, message.

Send

**Publish**

When the studio emits JSON, set the inbox this form should POST to. That address must be a verified Email Sending destination on this Worker if you restricted the binding.

Email

- 1 Form name**  
We used "Maple Street Bakery (Demo) - Cake Orders".
- 2 Destination email**  
Where every submission is emailed. We used our Gmail.
- 3 Create form endpoint**  
Click it to publish.
- 4 "Published."**  
It worked. The form is ready to use.
- 5 Preview**  
A first look at your form.

# Make the form match your brand

The screenshot shows the 'Appearance' settings panel on the left and a 'PREVIEW (TEST ONLY)' on the right. The 'Appearance' panel has sections for 'Font', 'Submit button label', 'Colors', and 'Question order'. The 'Font' section shows 'Nunito' selected. The 'Submit button label' section shows 'Send my request'. The 'Colors' section shows 'Field fill' (white), 'Text' (dark brown), 'Muted text' (light brown), 'Focus accent' (orange), 'Field fill' (white), 'Button color' (orange), and 'Button text color' (white). The 'Question order' section shows three questions: 'Name' (text, name, required), 'Email' (email, email, required), and 'Message' (textarea, message, required). The 'PREVIEW' shows the form with these settings applied. The 'Save appearance' button is highlighted with a red box and a red circle with the number 6.

**Appearance**

Font: Nunito

Submit button label: Send my request

Colors: Field fill, Text, Muted text, Focus accent, Field fill, Button color, Button text color

Question order: Up, Down, Name (text · name, required), Email (email · email, required), Message (textarea · message, required)

Endpoint

<https://forms.registermysite.com/f/c8mv823g6e>

Destination email

1 [registermysite.com@gmail.com](mailto:registermysite.com@gmail.com)

Allowed origins (comma separated)

3 <https://sites.registermysite.com>

Redirect after submit

4

Reply-to field

2 email

1

### Destination email

Every new submission is emailed here.

2

### Reply-to field

Set to "email", so clicking Reply in your inbox answers the customer.

3

### Allowed origins

Only your website can send to this form. Ours: <https://sites.registermysite.com>

4

### Redirect after submit

Optional. Leave it blank to use EdgeForm's "Message received" page.

### Built-in spam trap

The form includes a hidden "Leave blank" box. People never see it; spam bots fill it in.

### Pause any time

The Pause button (next to Copy endpoint) stops new submissions.

### Heads-up

Allowed origins also blocks the dashboard's own "Preview (test only)" send. Test on your live page instead.

# One copy gives you the whole form

HTML embed

```

  <input name="email" type="email" required>
  <textarea name="message" required></textarea>
  <button type="submit">Send my request</button>
</form>
```

### Good to know

Copy it again after any style change, so your page gets the new look.

# Add a Custom Embed section to your page

## Open your page in HTML Studio

[html-studio.registermysite.com](https://html-studio.registermysite.com). We used our Maple Street Bakery demo page.

## Click "+ Add New Section"

At the bottom of the Page Sections list on the left.

1

## Choose Custom Embed

Under Media: "Paste widget or embed HTML".

## Why not "Contact Form"?

HTML Studio has its own Contact Form section too (grey box). We used Custom Embed so the form is your EdgeForm, with your inbox, settings and dashboard.

# Paste, check the preview, and style the section

**1** The new section

We dragged it above the footer.

**2** Section name

Ours: "EdgeForm · Cake order form".

**3** Embed HTML

Paste the code you copied here.

**4** Section colors

Optional. We used bakery cream behind the form.

**5** Live Preview

Your form appears right away.

# Publish your page with Export & Deploy

**Export & deploy**

HTML is published to a path slug on the zone you pick — no new Worker is created. Example: sites.registermysite.com/your-slug

PROJECT NAME

1 Maple Street Bakery EdgeForm Demo

PUBLISH ZONE

sites.registermysite.com

SLUG

2 maple-street-bakery-edgeform-demo

3 https://sites.registermysite.com/maple-street-bakery-edgeform-demo/  
Slug is available.

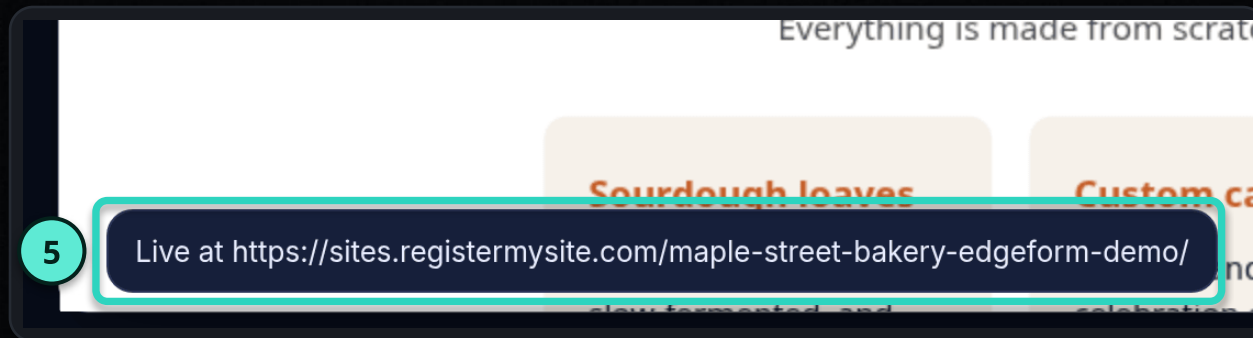

4 Publish slug

Download HTML Cancel

## Click Export & Deploy

Top right of HTML Studio.

- 1 Project name**  
"Maple Street Bakery EdgeForm Demo".
- 2 Slug**  
The end of your web address: maple-street-bakery-edgeform-demo.
- 3 "Slug is available."**  
Good, nobody else has it.
- 4 Publish slug**  
Click it.
- 5 "Live at ..."**  
Your page is on the internet.

# Your form, on your page, ready for customers

**1 Maple Street Bakery (Demo) - Cake Orders**

Required fields must be completed before send.

you@company.com

Message

How can we help?

Send my request

**1** Please fill out this field.

**Maple Street Bakery (Demo) - Cake Orders**

Required fields must be completed before send.

Name

Jamie Demo

Email

registermysite.com+edgeform-test@gmail.com

Message

Hi! This is a test request for the Maple Street Bakery demo. I'd like an 8-inch vanilla birthday cake that says Happy Birthday, Sam for Saturday pickup. (Test submission for a guide, not a real order.)

Send my request

**2** Jamie Demo

**3** a test email address

**4** a pretend cake order, marked as a test

**5** Send my request

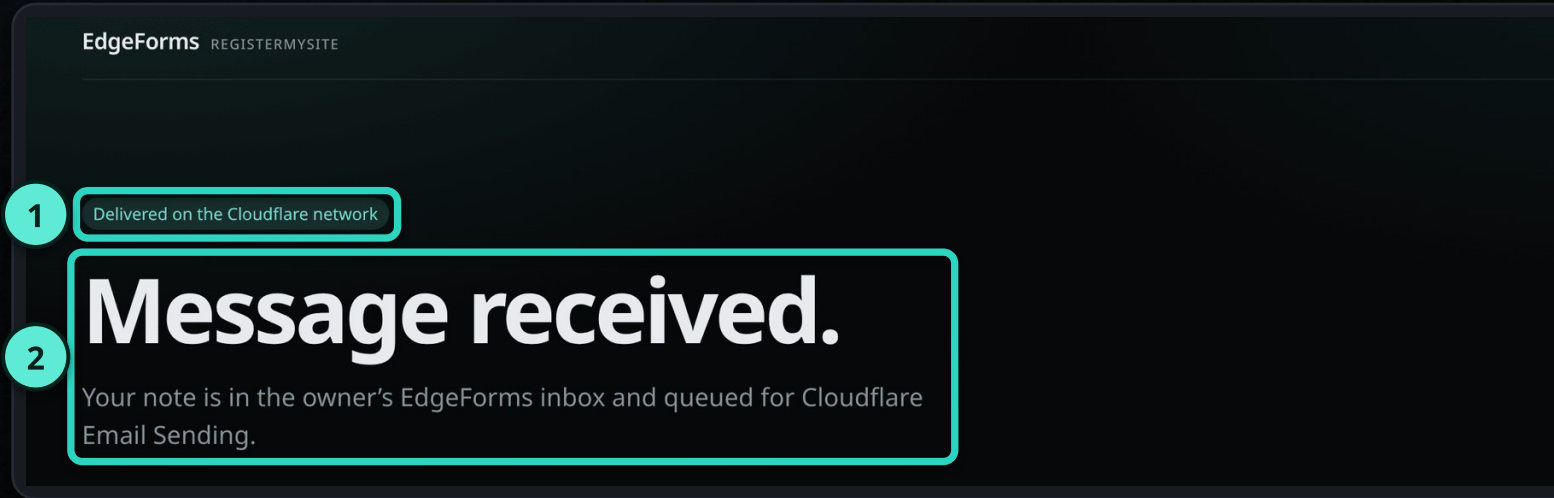

*All made-up test details.*

**1**

**"Please fill out this field."**

Every question is required, so empty sends are stopped.

# What your customer sees after sending

- 1 "Delivered on the Cloudflare network"**  
A small label at the top.

- 2 "Message received."**  
"Your note is in the owner's EdgeForms inbox and queued for Cloudflare Email Sending."

## Want your own page?

Make a thank-you page on your site and put its address in "Redirect after submit" in your form settings.

## Heads-up

This page has no link back to your website. A redirect to your own thank-you page fixes that.

# Every submission is counted and listed

Maple Street Bakery (Demo) - Cake Orders

| SUBMITTED AT          | MAIL | NAME | EMAIL | MESSAGE |
|-----------------------|------|------|-------|---------|
| 9/27/2026, 6:59:17 AM | sent |      |       |         |

Resend Raw

- "1 submissions"**  
Your forms list counts each one.
- Download CSV**  
Meant for a spreadsheet download.
- Submitted at**  
6:59:17 AM, seconds after we clicked send.

- Mail: sent**  
The email notification went out.
- Resend and Raw**  
Resend the email, or peek at the details. We didn't need Resend.

## What we saw in our test

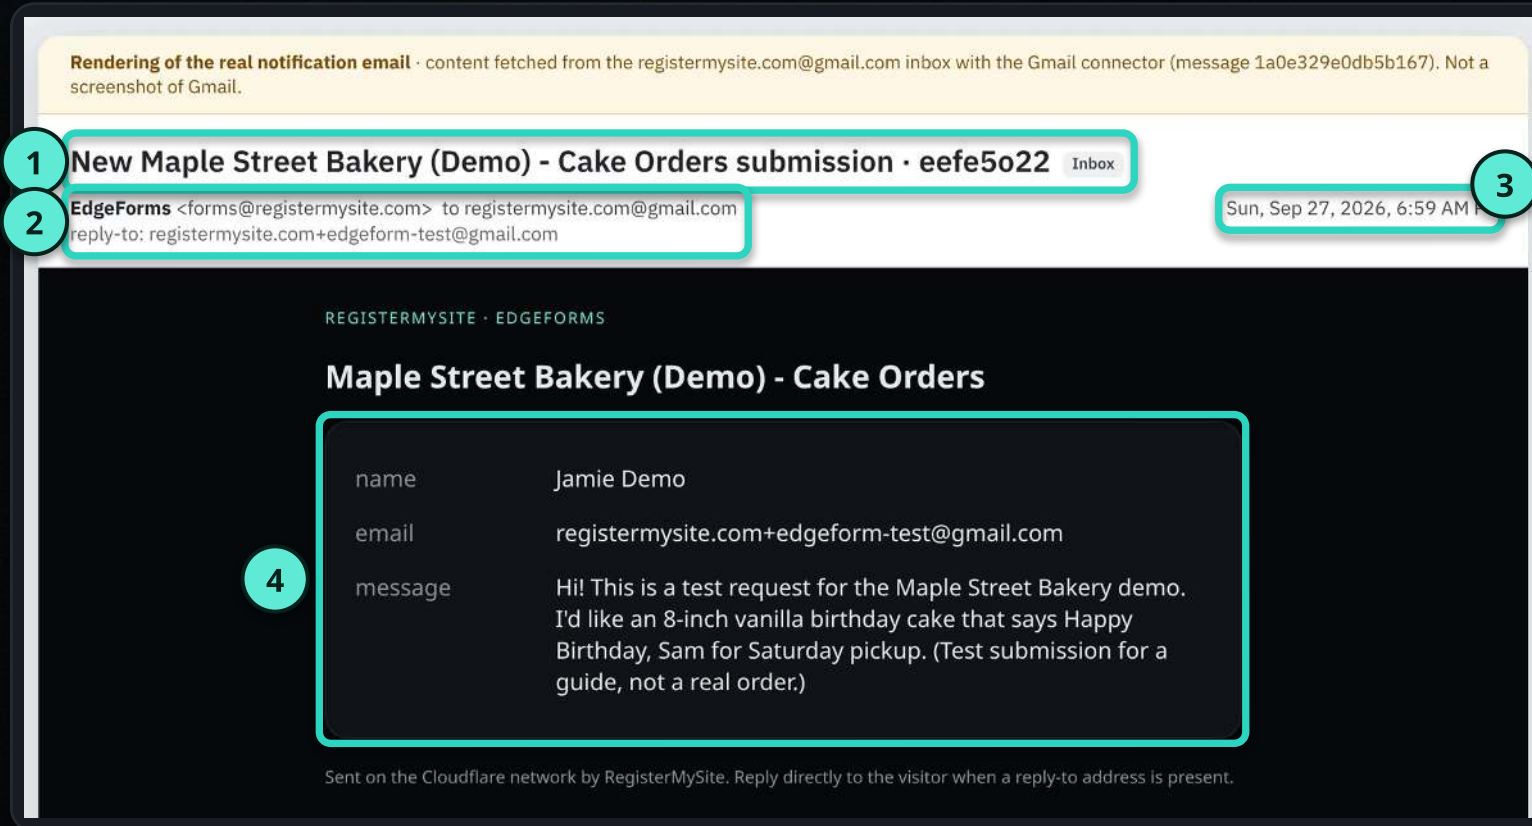

The Name, Email and Message columns stayed blank, even though the submission was saved.

"Raw" showed only {}.

Download CSV opened the EdgeForm home page instead of a file.

For now, your email notification is the full record of each message. We've reported these to the EdgeForm team.

# Each submission lands in your inbox

- 1 Subject**  
"New Maple Street Bakery (Demo) - Cake Orders submission"
- 2 From and reply-to**  
From EdgeForms. Reply goes straight to the customer.
- 3 Arrived at 6:59 AM PT**  
About 8 seconds after we clicked send.
- 4 The answers**  
Name, email and message, all there.

This is a rendering of the real email, made from the message we fetched from our Gmail inbox. It is not a screenshot of Gmail itself.

# Small things that make a big difference

## Use an inbox you check daily

Submissions arrive by email. Add a filter or label so they stand out.

## Just hit Reply

Keep the reply-to field set to "email" so replies go to the customer.

## Lock it to your site

Put your website address in allowed origins.

## Test on the live page

Send yourself a test after every change, and check your inbox.

## Re-copy after restyling

Save appearance, Copy embed, then paste again in HTML Studio.

## Pause instead of delete

Pause stops new submissions but keeps your form.

# Real messages we saw, and what to do

"The model did not return a fields array."

The studio didn't build your questions. EdgeForm will publish its standard Name, Email, Message form. Try again, or use the standard form.

"Ask the studio for fields first, or it will publish a default contact form."

A reminder next to Publish. Fine if the standard form is all you need.

"Origin is not allowed for this form"

The dashboard preview is blocked by allowed origins. Test on your live page instead.

"Please fill out this field."

A customer left a question empty. Every question is required.

Blank Name / Email / Message columns

Seen in Recent submissions. Your email notification has the full message.

Download CSV opens the home page

Not working in our test. Keep the emails as your record for now.

**Still stuck?** Call (562) 751-4597 or email [info@registermysite.com](mailto:info@registermysite.com) and we'll take a look with you.
