Counter

Save

Publish

Walkthrough recorded 3 October 2026. Free plan. Nothing on these slides was purchased.

1 This guide lives at <https://registermysite.com/guides/html-studio-guide>

SIX STEPS

The path, in order

Six steps. Do them in this order, and you end on a page you can open.

1 Account

Create an account and verify the email.

2 Template

Choose Bistro Lumière. Use in Studio.

3 Edit

Set the brand and the hero heading.

4 Counter

Add the visitor counter. Type: counter.

5 Save

Create the project from the canvas.

6 Publish

Publish the slug, then open the page.

Tip

Stay on the Free plan. This walkthrough did not buy anything.

SLIDE 3 OF 13

Create the account

Sign-up is the Create Account tab at registermysite.com/login.

Warning
New accounts must click the verification link within 1 hour, and the link arrives by email.

The screenshot shows a 'Welcome Back' page with a dark background. At the top, it says 'Welcome Back' in white and blue. Below that, it says 'Sign in to manage domains and collaborate on your website. New accounts require email verification.' There are two buttons: 'Continue with Google' (white with Google logo) and 'Continue with GitHub' (dark with GitHub logo). Below these is a link 'or continue with email'. At the bottom, there are two tabs: 'Sign In' and 'Create Account'. The 'Create Account' tab is selected, indicated by a blue underline and a red circle with the number '1' next to it. Below the tabs are three input fields: 'Full Name' (with placeholder 'Jane Doe'), 'Email' (with placeholder 'you@example.com'), and 'Password'.

3

The name and email in the picture are the form's sample placeholders, not an account from this walkthrough.

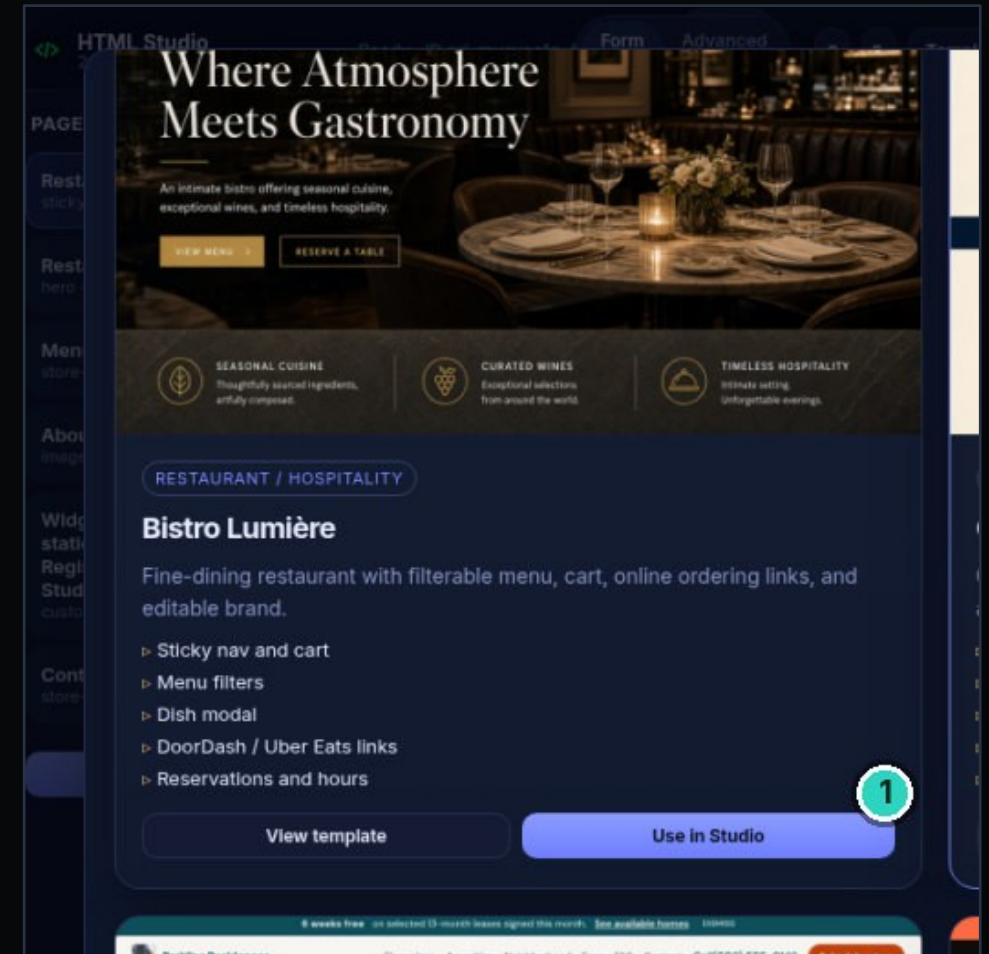

SLIDE 4 OF 13

Choose Bistro Lumière

Category Restaurant / Hospitality. Use in Studio loads it on the canvas.

**Tip**

View template only previews it. Use in Studio loads it on the canvas.

4

Card text: "Fine-dining restaurant with filterable menu, cart, online ordering links, and editable brand." Original hero line: "Where Atmosphere Meets Gastronomy".

SLIDE 5 OF 13

Set the brand

The preview sticky nav updates to Maple Street Bakery (Demo).

12

BRAND

Maple Street Bakery (Demo) 1

LOGO URL

PHONE

CTA TEXT

Reserve a Table

CTA URL

#reserve

COLORS FOR THIS SECTION ONLY

These pickers do not change other sections.

SECTION BACKGROUND

#111827

5

Other fields were left as the template: CTA TEXT "Reserve a Table", CTA URL #reserve. The header shows Ready and a project id. The crop truncates it.

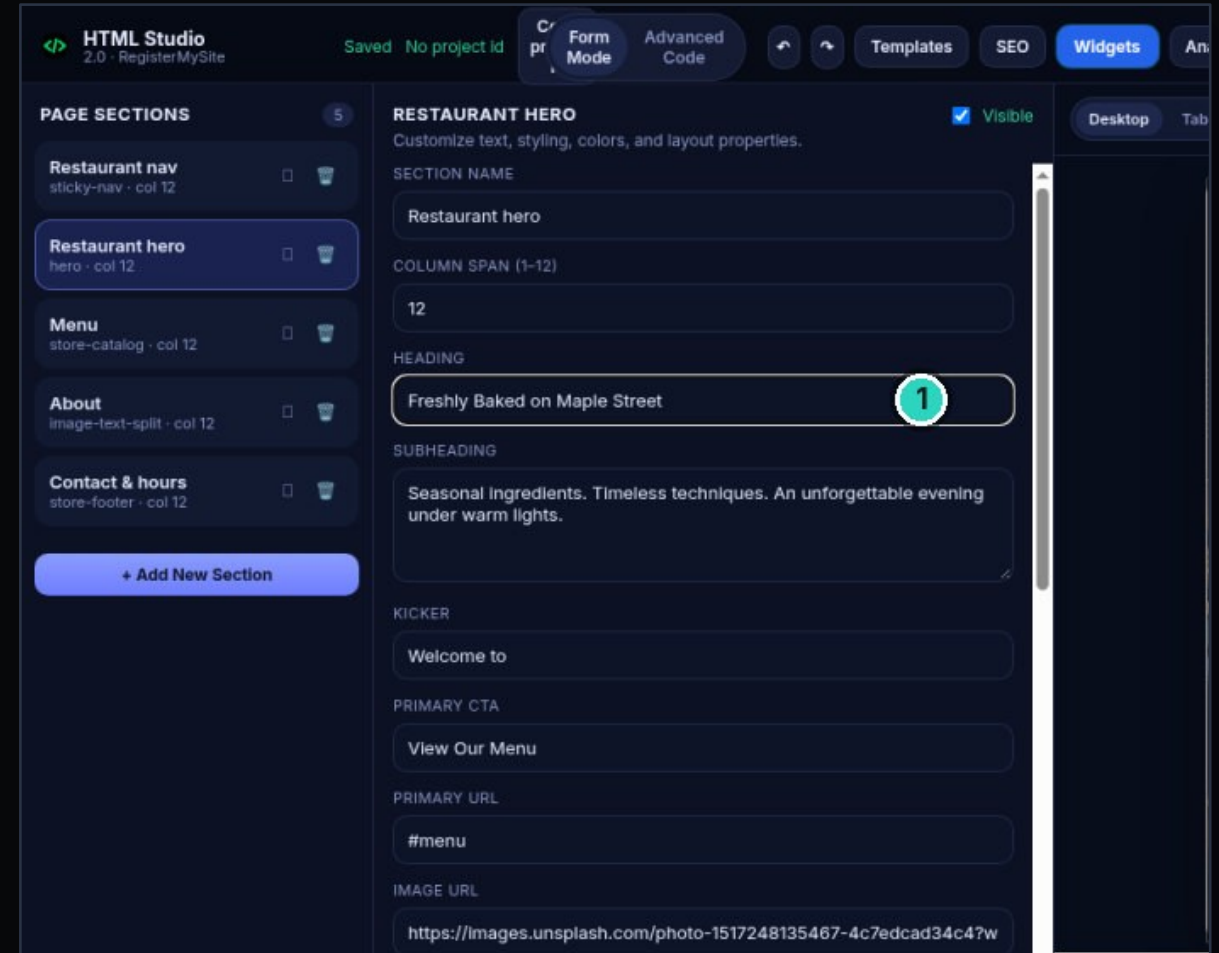

SLIDE 6 OF 13

Change the hero heading

HEADING is exactly Freshly Baked on Maple Street.

**Tip**

The subheading and kicker were left as the template wrote them.

6

Subheading left as “Seasonal ingredients. Timeless techniques. An unforgettable evening under warm lights.” Kicker left as “Welcome to”. This crop’s header says No project id.

SLIDE 7 OF 13

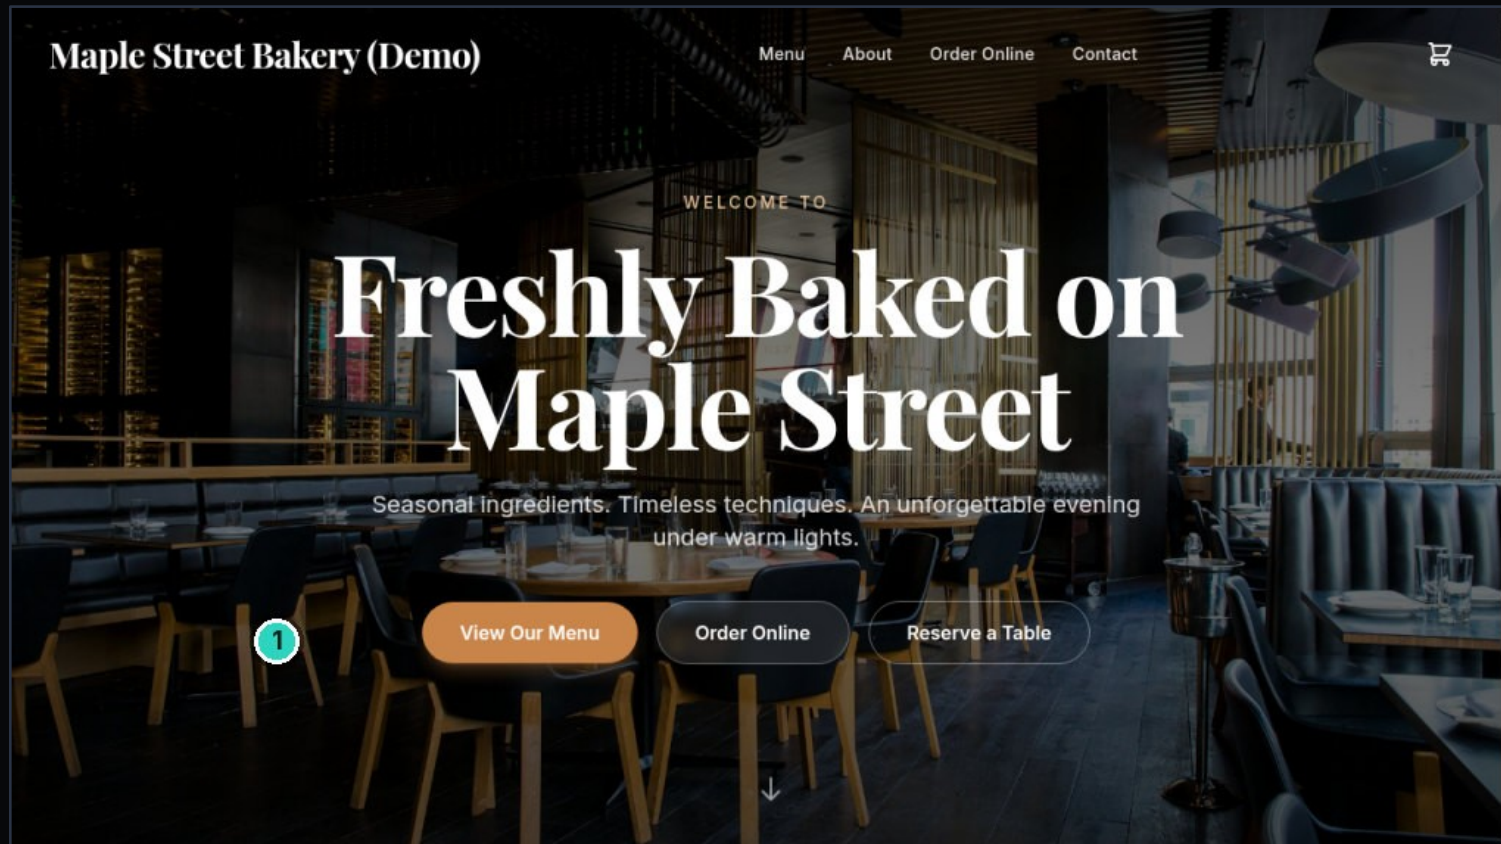

The rest is still the template

The brand and one heading changed. The sample page underneath did not.

Warning

Menu, phone, address, and photos are still Bistro Lumière sample content until you edit those sections.

7

This crop is the hero. Menu, phone, and address sit further down the page and are still sample content. The phone is (555) 123-4567, shown on the counter slide.

SLIDE 8 OF 13

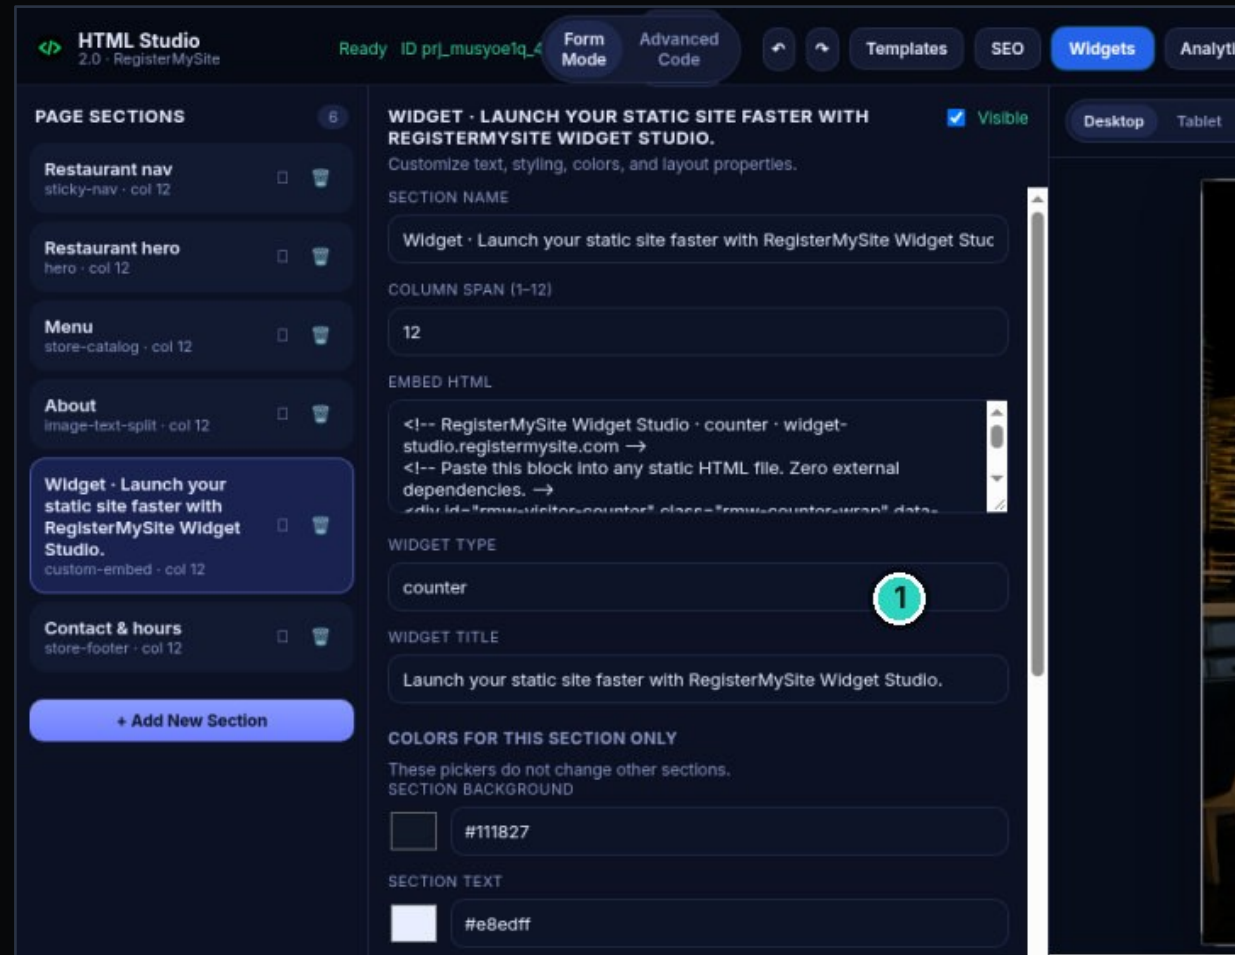

Add the visitor counter

WIDGET TYPE reads counter. That is the widget we exported.

Tip

If the type does not say counter, you exported a different widget.

8

The embedded HTML comment includes "RegisterMySite Widget Studio - counter". Exported with "Export to HTML Studio" and "Send embed back to HTML Studio". No Widget Studio screenshot was captured.

SLIDE 9 OF 13

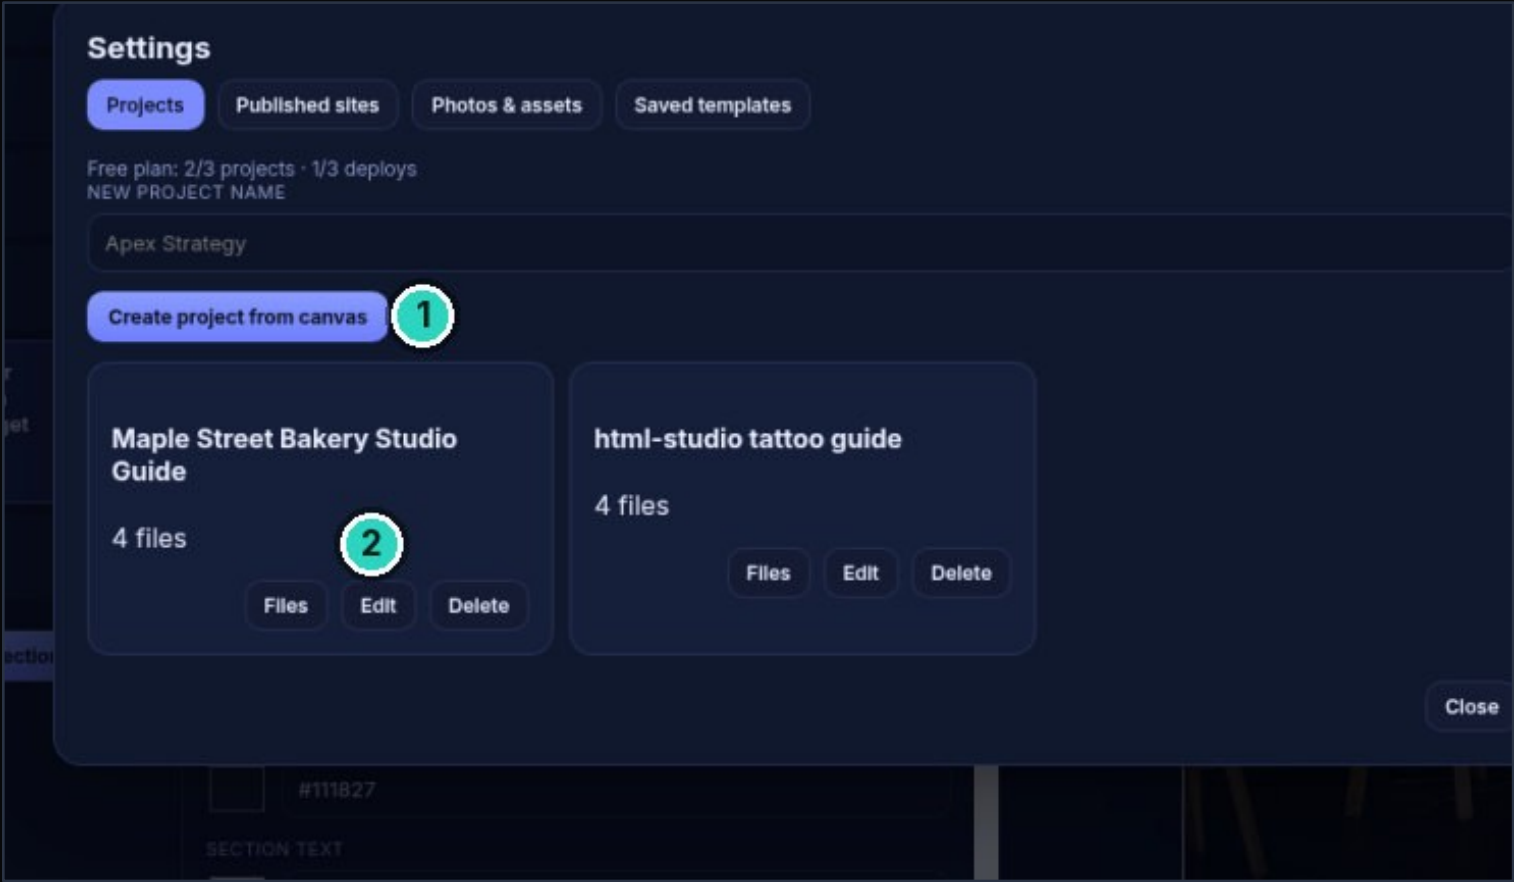

Save the project

Free plan on this screen: 2/3 projects and 1/3 deploys.

!

Warning

Until you do this, the header can say "No project id".

9 Other card "html-studio tattoo guide" was already on the account, not part of this walkthrough. Full project id recorded: prj_musyoe1q_4g4822g3j4. Header crops show "ID prj_musyoe1q_4..." only.

SLIDE 10 OF 13

Name the zone and the slug

No new Worker is created. The public URL uses the slug.

**Tip**

"You own this slug — publish will update it."

<html lang="en">

Export & deploy

HTML is published to a path slug on the zone you pick — no new Worker is created. Example: sites.registermysite.com/your-slug

PROJECT NAME

Bistro Lumière

PUBLISH ZONE

sites.registermysite.com 1

SLUG

maple-street-bakery-studio-guide 2

https://sites.registermysite.com/maple-street-bakery-studio-guide/
You own this slug — publish will update it.

Download HTML Cancel Publish slug

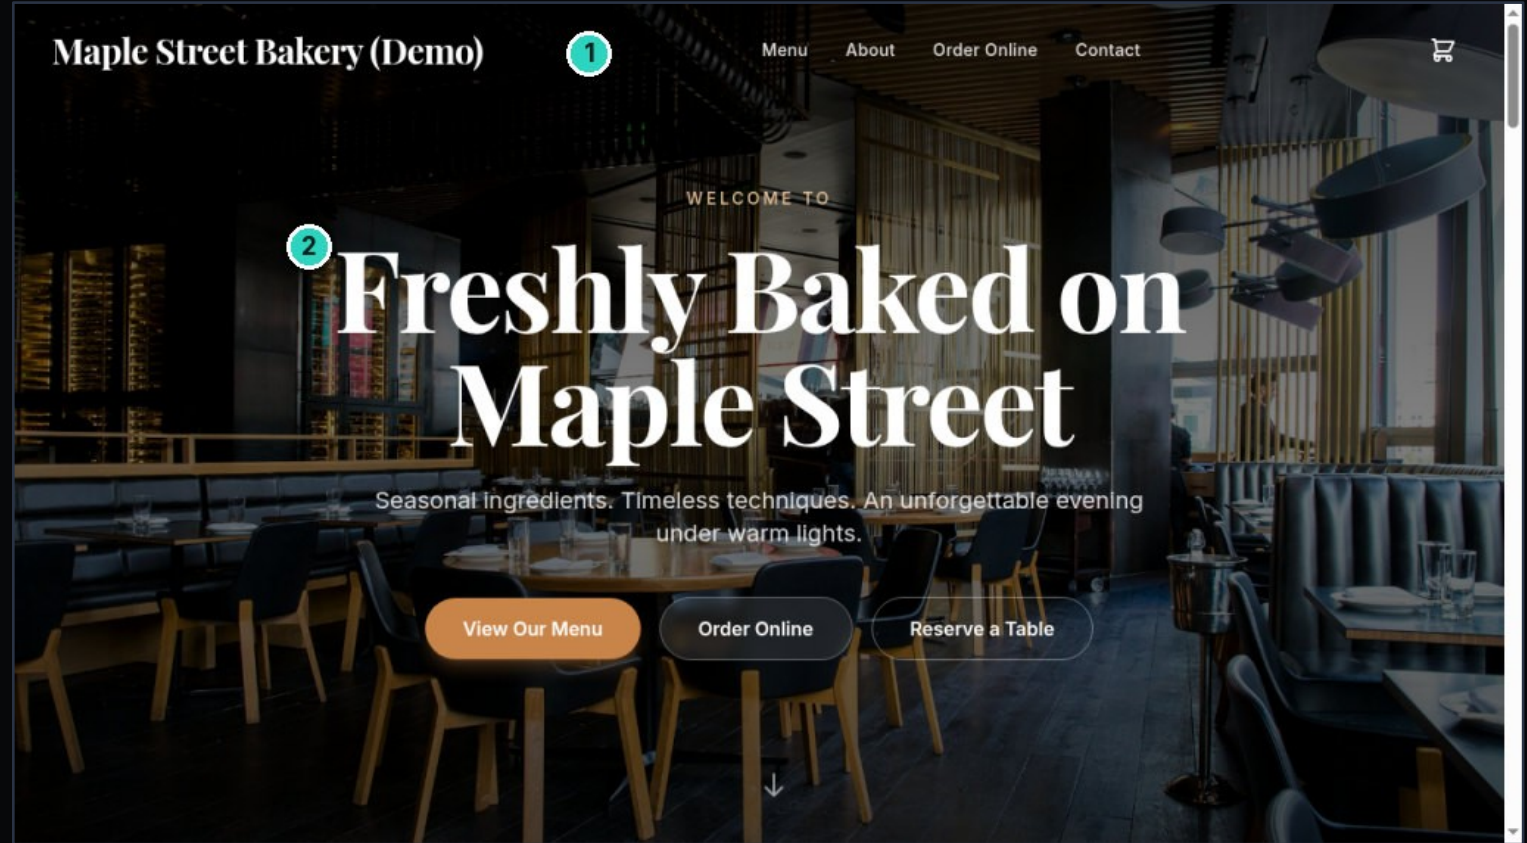

10

Project name in this dialog still said Bistro Lumière. The public URL uses the slug. "HTML is published to a path slug on the zone you pick — no new Worker is created."

SLIDE 11 OF 13

Open the published page

<https://sites.registermysite.com/maple-street-bakery-studio-guide/>

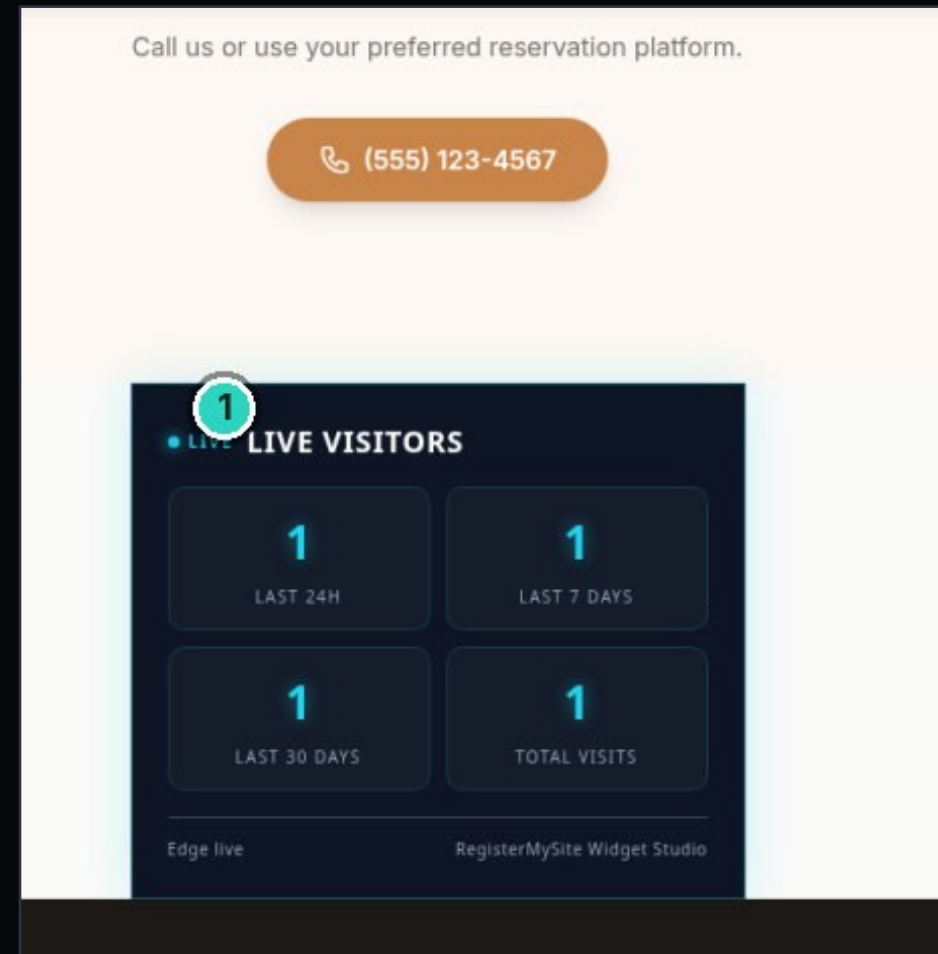

SLIDE 12 OF 13

Find the visitor counter

LIVE VISITORS, four boxes. In this screenshot each box shows 1.

Warning
The phone number above it is still the template's (555) 123-4567.

12 Each box shows 1 in this screenshot only. Do not read that as a typical count. Labels on screen: LAST 24H, LAST 7 DAYS, LAST 30 DAYS, TOTAL VISITS.

RECAP

The six steps, again

1 Create the account and click the verification link within one hour.

2 Choose Bistro Lumière and click Use in Studio.

3 Set the brand and the hero heading. The rest is still the template.

4 Add the visitor counter and check the type says counter.

5 Save the project from the canvas so the header has a project id.

6 Publish the slug and open the live page.
