SVG Studio

Workers AI, a live preview, and markup you can download. The preview is the check.

Walkthrough on 3 October 2026. The empty preview says the SVG streams in. The bakery page is the one this guide follows.

Preview

Loaf

Publish

Live tab

`svg-studio.registermysite.com`

WHAT THE HEADER SAYS

Workers AI · live preview · production markup.

The preview is the check. A caption can describe a loaf while the picture is still three bars.

FIVE STEPS

The path, in order

Send a prompt, read the preview, download only a loaf, publish, then check the live tab.

1 Open SVG Studio

Send a prompt. The Favicon chip is not the control.

2 Read the preview

The caption can say loaf while the picture is three bars.

3 Download the loaf

Download SVG or Copy SVG, only when the preview is a loaf.

4 Publish the page

HTML Studio. Zone sites.registermysite.com. Slug bistro-lumi-re.

5 Check the live tab

The header stays words. The mark is the favicon, not a logo.

**Tip**

The Favicon chip still says "S monogram at 32px". It was not the control used on this walk.

2

No still shows a favicon link in Advanced Code. Generate until the preview is a loaf, download or copy, publish, then check the live tab.

SLIDE 3 OF 8

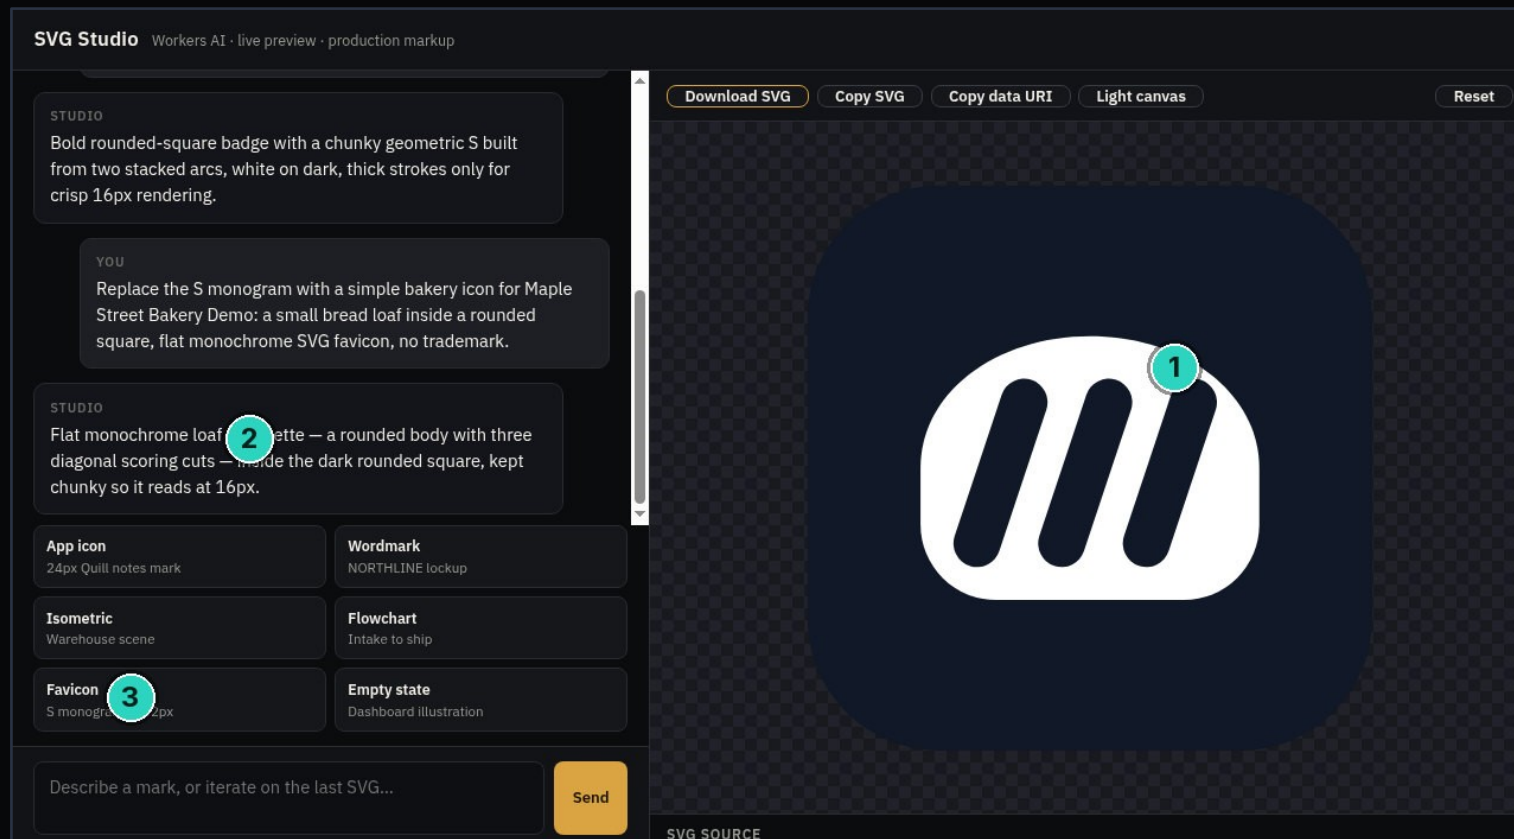

The first preview is not a loaf

The caption describes a loaf. The preview is three thick diagonal bars in a dark rounded square.

Warning

Read the preview, not only the caption. Three bars are not a loaf, even when the studio text says they are.

3

Prompt asked for a loaf. Studio text describes a loaf. Preview: three thick diagonal bars in a dark rounded square. favicon.svg on disk is not this preview.

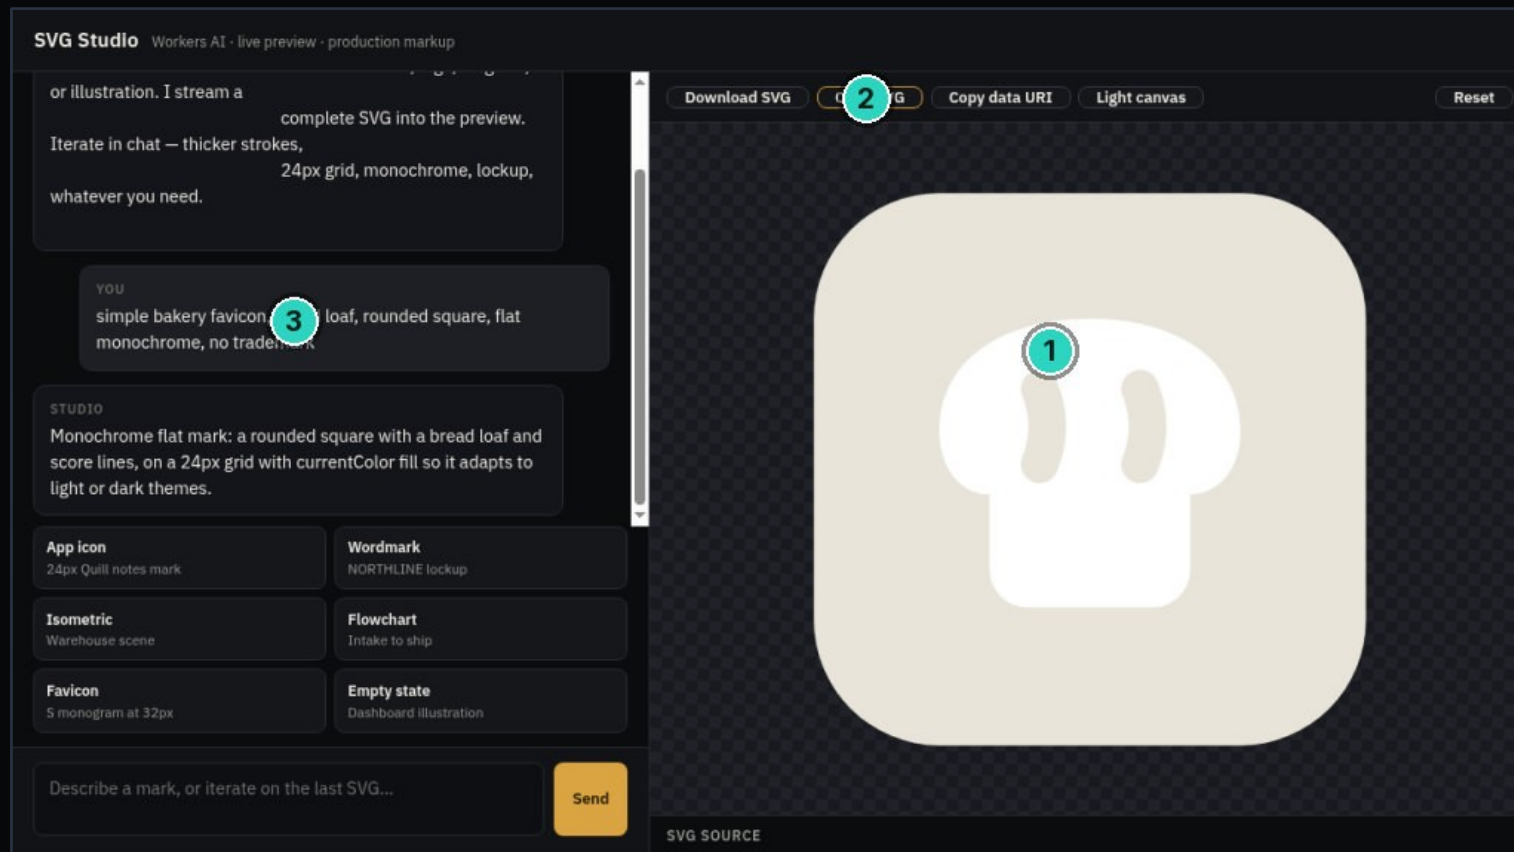

SLIDE 4 OF 8

The loaf mark

A later send. Pale rounded square, a white loaf, two score marks. Copy SVG is the highlighted button.

**Tip**

Copy SVG is highlighted. The download is 24 by 24, currentColor square, white loaf, two score strokes. Not favicon.svg.

4

Studio: "Monochrome flat mark: a rounded square with a bread loaf and score lines, on a 24px grid with currentColor fill so it adapts to light or dark themes." Download: favicon-from-studio.svg matches this loaf.

SLIDE 5 OF 8

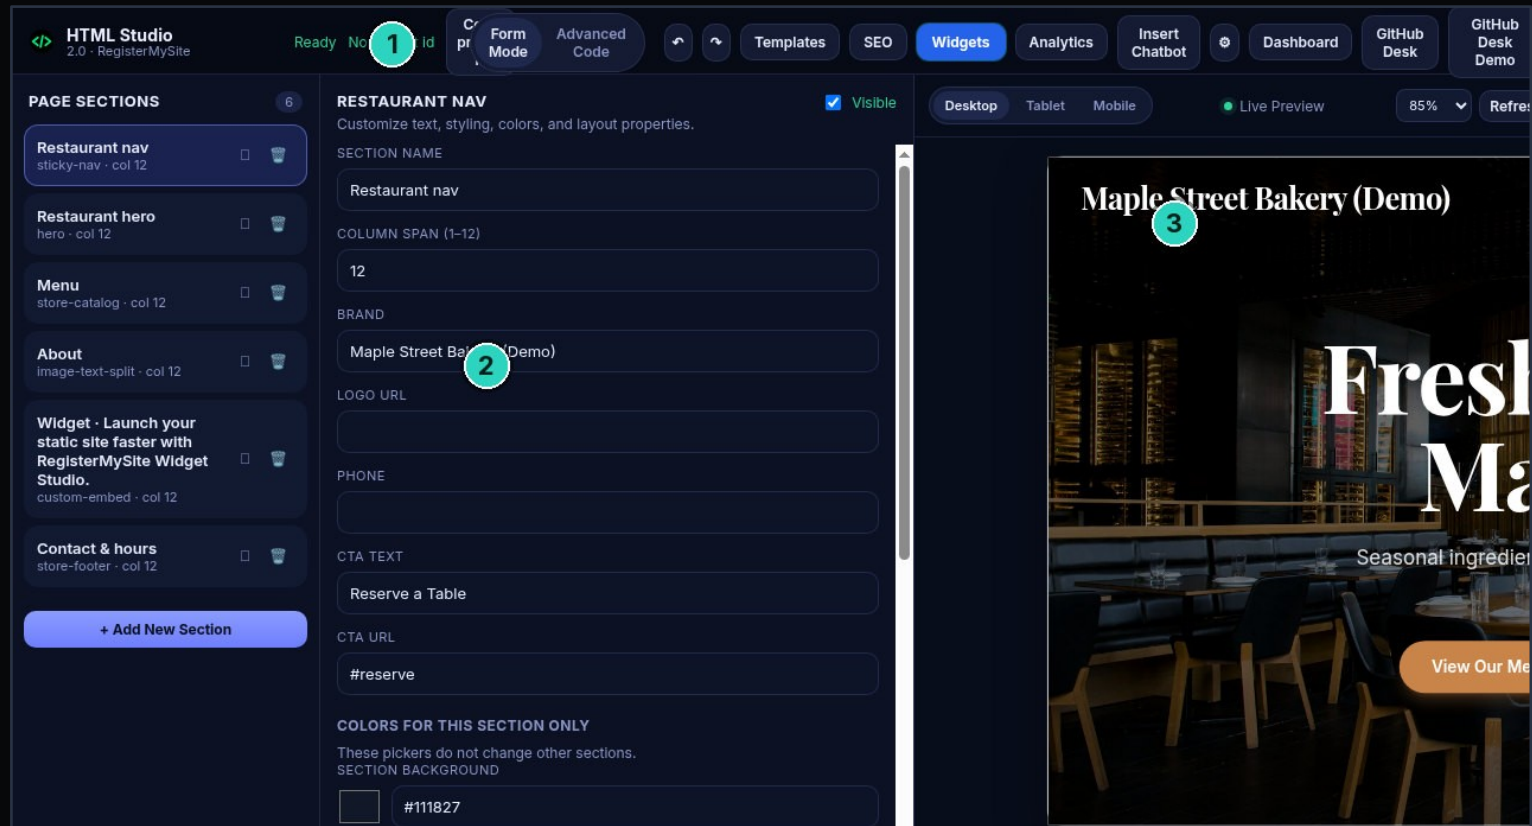

HTML Studio, no project id

This is not a login wall. The header says Ready, and No project id. The brand is Maple Street Bakery (Demo).

Warning

Not a login wall. No project id is still on screen. The Advanced Code crop does not show the favicon link.

5

Shot 03: Ready, No project id, brand Maple Street Bakery (Demo). The Advanced Code crop (menu handlers, renderMenu, updateCartUI) has no link rel icon. That crop is not shown here.

SLIDE 6 OF 8

Publish to bistro-lumi-re

Export and deploy, from the recording. Zone, slug, and four buttons. No toast was captured.

Warning

No toast was captured. Do not assume the dialog itself is the confirmation.

Export & deploy

HTML is published to a path slug on the zone you pick — no new Worker is created. Example: sites.registermysite.com/your-slug

PROJECT NAME

Bistro Lumière

PUBLISH ZONE

sites.registermysite.com 1

SLUG

bistro-lu 2

https://sites.registermysite.com/bistro-lumi-re/
Slug is available.

Download HTML Cancel Send to Wrangler Publish slug 3

6

Buttons on this dialog: Download HTML, Cancel, Send to Wrangler, Publish slug. Zone sites.registermysite.com. Slug bistro-lumi-re. No toast in the recording.

SLIDE 7 OF 8

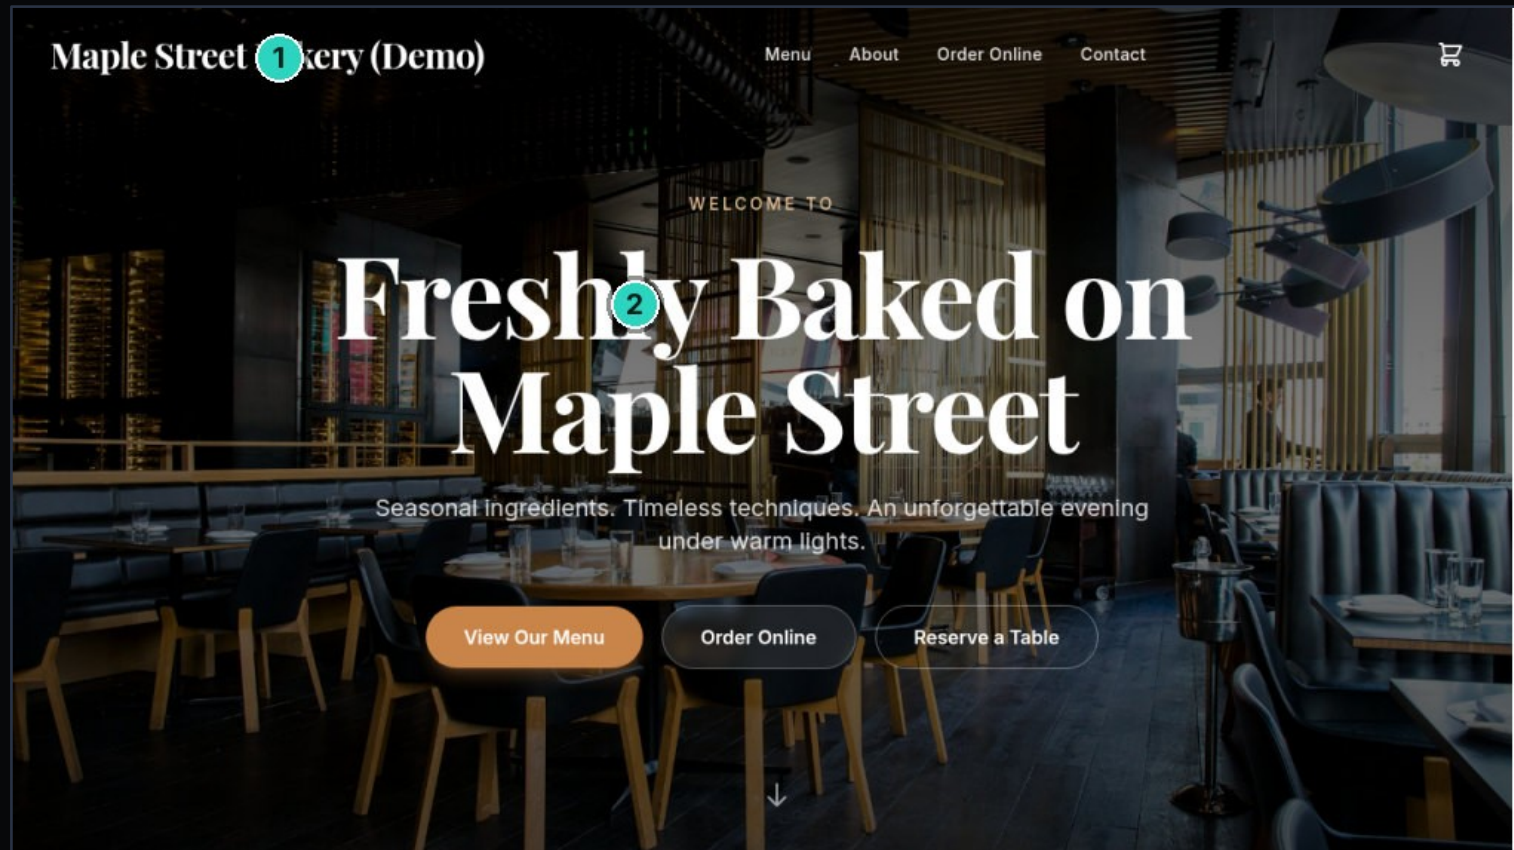

The live page, and the tab

The header is the words Maple Street Bakery (Demo). The hero is Freshly Baked on Maple Street. The loaf is not in the header.

Warning

Do not draw a loaf into the tab. Shot 05's tab icon is three bars. Shot 08 does not show a readable loaf.

7

<https://sites.registermysite.com/bistro-lumi-re/> . Header text did not change. Stills do not show a readable loaf in the tab. Ryan confirmed the bread mark on that URL.
